

Abstract

[Abstract]

[Object]

To provide a surface protective sheet having superior anti-ultraviolet property and exhibiting little yellow tint.

[Means for Solution]

The surface protective sheet of the present invention has an anti-ultraviolet layer on at least one surface of a plastic film, and the anti-ultraviolet layer comprises an ultraviolet absorber, an ionizing radiation curable resin composition, and spherical microparticles having a mean particle diameter of 1 to 20 μm , and the microparticles are contained in an amount of 0.4 to 3% by weight in the anti-ultraviolet layer. The anti-ultraviolet layer preferably contains 0.01 to 1% by weight of organopolysiloxane.
